Electric Vehicle Details

Make	Model	Sum of Model_Year	Sum of Electric_Range	EV_Type
TESLA	MODEL Y	120014286	672792	Battery Electric Vehicle (BEV)
TESLA	MODEL 3	76611378	3159882	Battery Electric Vehicle (BEV)
NISSAN	LEAF	27263832	1026315	Battery Electric Vehicle (BEV)
TESLA	MODEL S	15632988	1261235	Battery Electric Vehicle (BEV)
CHEVROLET	BOLT EV	15582471	1281973	Battery Electric Vehicle (BEV)
TESLA	MODEL X	13783545	767725	Battery Electric Vehicle (BEV)
FORD	MUSTANG MACH-E	12970305	0	Battery Electric Vehicle (BEV)
VOLKSWAGEN	ID.4	12146770	0	Battery Electric Vehicle (BEV)
HYUNDAI	IONIQ 5	11713798	0	Battery Electric Vehicle (BEV)
RIVIAN	R1S	10165356	0	Battery Electric Vehicle (BEV)
JEEP	WRANGLER	10108401	106838	Plug-in Hybrid Electric Vehicle (PHEV)
TOYOTA	RAV4 PRIME (PHEV)	9574225	198744	Plug-in Hybrid Electric Vehicle (PHEV)
CHEVROLET	VOLT	9023034	203765	Plug-in Hybrid Electric Vehicle (PHEV)
FORD	F-150	8262425	0	Battery Electric Vehicle (BEV)
TOYOTA	PRIUS PRIME (PHEV)	7976517	115682	Plug-in Hybrid Electric Vehicle (PHEV)
CHRYSLER	PACIFICA	7856208	124987	Plug-in Hybrid Electric Vehicle (PHEV)

Key Insights from Electric Vehicle Dashboard

1. Total Electric Vehicles (KPI)

The dataset shows a total electric range contribution of approximately 11 million, indicating a large and rapidly growing electric vehicle ecosystem.

2. Average Electric Range (KPI)

The average EV range is 39.44, reflecting ongoing improvements in battery efficiency and the capability of EVs to support everyday transportation needs.

3. Number of Cities with EVs (KPI)

Electric vehicles appear across 276K+ city records, demonstrating widespread adoption and increasing global accessibility to EV technology.

4. Electric Vehicle Growth Over Time

EV adoption remained low before 2010, but experienced rapid growth after 2015, with a peak around 2022, showing a strong shift toward electric mobility.

5. Electric Vehicle Type Share

Battery Electric Vehicles (BEVs) dominate the market with nearly 80% share, while Plug-in Hybrid Electric Vehicles (PHEVs) represent about 20%, indicating a strong preference for fully electric vehicles.

6. EV Distribution by City (Map)

The geographic map shows that EV adoption is concentrated in developed regions, particularly North America and Europe, where charging infrastructure and government incentives are stronger.

7. Electric Vehicles by Make

Tesla leads the EV market by a significant margin, followed by manufacturers such as Chevrolet, Nissan, and Ford, highlighting Tesla’s strong influence in the EV industry.

8. EV Type by Model Year

Recent model years show a higher number of Battery Electric Vehicles compared to Plug-in Hybrids, indicating that manufacturers are shifting production toward fully electric models.

9. Electric Vehicle Details Table

The dataset highlights popular EV models such as Tesla Model Y, Tesla Model 3, Nissan Leaf, and Chevrolet Bolt EV, which play a major role in driving EV adoption.

10. EV Model Performance and Range

Several EV models demonstrate higher electric range values, suggesting that technological advancements in battery design are improving vehicle performance and driving range.
